成石化管線資訊系統。「假如台灣早就做到這種程度，高雄市日前發現氣體外洩時，第一時間就能知道該地區有哪些管線經過，災害不會這麼嚴重。」

原本散落在各地的資訊，透過開放與加值，可把原本看似不相干的元素組合成有用的資訊。房點子顧問公司開發出的「3秒算房價」，結合內政部不動產交易實價登錄與Google地圖，再考慮樓層、距捷運站距離、建築物新舊等資訊，精準估計出某棟樓某層公寓的市價範圍。

但這個系統還缺了重要一角。房點子總經理蔡明沛，本身就是位專業不動產估價師，他坦承，當初其實很想把雙北市的海砂屋、輻射屋、凶宅、土石流潛勢區等資訊都列入估計，但政府相關單位都不願意釋出完整原始資料，其中內政部的「山坡地丙種建地」甚至只允許「一筆筆打電話詢問，不對外公開」，他只好在APP裡提供連結讓民眾自行查詢。

對有志於使用政府開放資料的創業者來說，除了各單位不願提供資料，公務機關的繁文縟節更讓他們頭大。

程思科技以「Youbiker」APP，結合公共自行車租借資訊與周遭商家折扣訊息，獲得經濟部工業局open data應用推動計畫特優獎20萬元，更被列為五家重點輔導的新創企業之一。二十七歲的年輕創業家曾映傑說，跟政府拿資料不但要寫冷冰冰的公文，還要每月交報告交代資料使用狀況，讓他們一個頭兩個大。

曾映傑舉美國政府為例，他們把所有道路交通違規資料都開放在網路上，許多公司下載後製作成開罰單、抓超速系統，讓許多警察局樂於購買使用。「將資料公開，只要花少少經費，卻能讓許多廠商進行加值後，做出更棒的系統，比警察局自己找廠商、寫系統來的省錢，也更有競爭力。」

台灣政府機關對於資料的看法，往往是「保護」大過「開放」，連行政院科技會報執行秘書鐘嘉德都坦承，「開放資料最重要的第一步，是改變公務人員的思維。」

國發會資訊管理處負責協調各部會開放資料，副處長莊明芬強調，許多單位一開始不願意提供資訊，是因為怕被錯誤解讀，但她強調，官員的心態要改變。「我常跟他們說，A單位上架青椒，B部會上架牛肉，自然會有能人可以把他們變成青椒炒牛肉。」

但如果青椒沒洗，牛肉沒切，就算貨架都塞滿滿，恐怕也會乏人問津。台灣政府推動開放資料，雖然才剛起步，如果能好好利用充沛的民間智慧，激發的商機與應用不可限量。

CC BY 4.0 required on U.S. Department of Labor \$150M grant

Cable Green, March 28th, 2014

Creative Commons actively works to support foundations, governments, IGOs and other funders who create, adopt and implement open policies. We believe publicly funded resources should be openly licensed resources.

To support these and other emerging open policy efforts, CC is about to launch, with multiple global open organizations, an [Open Policy Network](#) and Institute for Open Leadership.

The U.S. Department of Labor (DOL) has led the way in using open policy requirements in solicitations for grant requirements first with its Career Pathways Innovation Fund Grants Program (<http://www.dolleta.gov/grants/pdf/SGA-DFA-PY-10-06.pdf>), then with its Trade Adjustment Assistance and Community College Career Training grant program (dolleta.gov/taaccct). Now they are once again requiring the Creative Commons Attribution (CC BY) license on all content created with the grant funds and modifications made to pre-existing, grantee-owned content using grant funds in their Ready to Work Partnership grant program. Bravo!

The U.S. Department of Labor has announced the availability of approximately \$150 million in funds for the H-1B Ready to Work Partnership grant program. DOL expects to fund approximately 20-30 grants with

Initiative for transparent data ... +

When nobody doubts the importance of transport infrastructure, the data infrastructure is very neglected. At the same time the investments into data infrastructure lead to the growth of knowledge economics in the same way that investments into transport infrastructure lead to the growth of economics.

Relationship between the strategy of computerization of public administration (eGovernment) and our initiative

These two concepts are not concurrent. On the contrary, they complement each other. The strategy of eGovernment in The Czech Republic focuses on computerization of the processes in the public administration. The construction of data infrastructure focuses primarily on transparent disclosure of data created during these processes.

The Data infrastructure helps with the computerization of processes (the transparent data can be used by the public administration itself). The more the computerization of public administration processes develops, the more data will be available for transparent disclosure.

The release of public sector information (PSI) creates opportunities for innovative use and reuse of data, and allows the commercial, research and community sectors to add value. Releasing PSI also assists government in making evidence-based policy and service delivery decisions, and supports increased citizen participation in government.

Guidance is now available on the [Web Guide](#) to assist agencies in identifying, preparing and publishing public sector information.

About the Open Government Licence

The Controller of Her Majesty's Stationery Office (HMSO) has developed this licence as a tool to enable Information Providers in the public sector to license the use and re-use of their Information under a common open licence. The Controller invites public sector bodies owning their own copyright and database rights to permit the use of their Information under this licence.

The Controller of HMSO has authority to license Information subject to copyright and database right owned by the Crown. The extent of the Controller's offer to license this Information under the terms of this licence is set out on [The National Archives website](#).

This is version 2.0 of the Open Government Licence. The Controller of HMSO may, from time to time, issue new versions of the Open Government Licence. If you are already using Information under a previous version of the Open Government Licence, the terms of that licence will continue to apply.

These terms are compatible with the [Creative Commons Attribution License 4.0](#) and the Open Data Commons Attribution License, both of which license copyright and database rights. This means that when the Information is adapted and licensed under either of those licences, you automatically satisfy the conditions of the OGL when you comply with the other licence. The OGLv2.0 is Open Definition compliant.

About | What is OA? | Why it matters? | Resources | CC licenses | Search OA publications | Terms of use

An open door to UNESCO's knowledge

Building peaceful, democratic and inclusive knowledge societies across the world is at the heart of UNESCO's mandate. Universal access to information is one of the fundamental conditions to achieve global knowledge societies. This condition is not a reality in all regions of the world.

In order to help reduce the gap between industrialized countries and those in the emerging economy, UNESCO has decided to adopt an [Open Access Policy](#) for its publications by making use of a new dimension of knowledge sharing - Open Access.

Open Access means free access to scientific information and unrestricted use of electronic data for everyone. With Open Access, expensive prices and copyrights will no longer be obstacles to the dissemination of knowledge. Everyone is free to add information, modify contents, translate texts into other languages, and disseminate an entire electronic publication.

For UNESCO, adopting an Open Access Policy means to make thousands of its publications freely available to the public. Furthermore, Open Access is also a way to provide the public with an insight into the work of the Organization so that everyone is able to discover and share what UNESCO is doing.
